

FIXED-HORIZON PERFORMANCE COMPARISON

Parameter-set results at 6 months, 1 year, and 2 years after actionable entry

Each return uses the first available trading price on or after the calendar horizon. Unmatured selections are excluded. Final combined rank is the mean of the three average-return ranks and requires the minimum completed sample at every horizon.

Method

- 6-month return: price on the first trading date on or after entry date plus 6 calendar months.
- 1-year and 2-year returns follow the same rule using calendar-year anniversaries.
- Average, median, and win rate use only selections that have completed that horizon.
- A-F and A-H are ranked separately because their confirmation timing and entry dates differ.

Screen Overview

Screen	Sets	Selections	6m complete	1y complete	2y complete	Min N	Combined eligible
A-F	192	3,698	3,364	3,050	2,436	30	24
A-H	192	1,928	1,748	1,576	1,292	15	24

Combined Leaders

- A-F: ag3_qg2_ay2_qc4_vr2_vd2 leads with 2.68%, 8.35%, and 10.22% average returns at 6m/1y/2y; combined rank score 4.67.
- A-H: ag2_qg2_ay3_qc2_vr2_vd2 leads with 2.87%, 14.60%, and 10.03% average returns at 6m/1y/2y; combined rank score 3.33.

A-F Combined Ranking

Minimum completed observations per horizon: 30. Lower combined rank score is better. N is shown as 6m/1y/2y.

Rank	Parameter set	N 6m/1y/2y	Avg 6m	Avg 1y	Avg 2y	Ranks 6m/1y/2y	Combined

7	ag3_qg2_ay2_qc2_vr 2_vd3	21	6.46%	-4.19%	47.62%
8	ag3_qg2_ay2_qc2_vr 2_vd2	27	6.28%	0.65%	51.85%
9	ag2_qg3_ay2_qc3_vr 2_vd3	19	6.20%	-4.19%	47.37%
10	ag3_qg3_ay2_qc2_vr 2_vd2	24	5.90%	-1.77%	50.00%

Interpretation and Limitations

- The combined rank rewards consistency across horizons; it does not weight horizons by economic importance.
- Completed-horizon filtering means newer selections contribute to 6-month results before they can contribute to 1-year or 2-year results.
- Returns do not yet model transaction costs, dividends not captured by adjusted prices, portfolio overlap, position sizing, or delisting bias.
- Parameter sets reuse many securities and dates, so rank differences are descriptive rather than proof of statistical significance.
